

BLUE POINT / RED POINT LED SAFETY LIGHT

An Ounce of Prevention

Did you know that over 94,000 workplace injuries related to forklift accidents are reported every year? According to Bureau of Labor Statistics and OSHA, almost 80% of those accidents involve a pedestrian.

Start the New Year right with this Safety Feature and make a huge difference on:

- Employee Safety
- Prevent Forklift Accidents
- Ensure Productivity
- Secure your Bottomline

Designed to increase safety and minimize the risk of accidents around machinery TYRI Lights has designed the BluePoint and RedPoint. The concentrated light beam displays a dot on the floor in front or behind the machine to alert workers there is a machine approaching. This industry leading concept allows safety to be visual instead of relying solely on sirens and alarms especially in loud noisy workplaces where hearing is difficult. The light is available in blue or red color options.
